The Treasury Department offers three choices to holders of Series E, United States Defense Bonds, when their Bonds mature: Choices: You may: One, accept cash, if you so desire; Two, continue to hold the esent bond with an automatic interest-bearing xtension; Three, exchange your bonds in amounts of \$500 or multiples for a Defense Bond of Series which earns current income at the rate of 21/2 percent payable semi-annually.

Action: If you want to obtain cash, you simply present your bond, with proper identification, to any paying agent. If you want to extend the matured bond you have ABSOLUTELY NOTH-ING TO DO-just continue to hold it. Extended bonds may be cashed at any time you wish. If you want a G Bond, see your bank for details. Interest: The extended bond will earn simple interest on the face amount at the rate of 21/2 percent for the first seven and one-half years.

Thereafter it will be at a higher rate sufficient to provide a total return for the 10-year extension period of 2.9 percent compounded. Taxes: You have the choice of (1) reporting E Bond interest for Federal income taxes on an annual basis or (2) paying the taxes on the interest in the year when the bonds finally mature or are redeemed. The privilege of deferring taxes does not apply if the E Bond is exchanged for a G Bond.
